Preparing for Feasibility Study: Educational Plan

Educational Program Priority Goals (working draft)

- Authentic and engaged learning
 - Be a place where relevance and purpose in instruction develop student engagement
 - Create a learning environment where all students engage in authentic, hands-on learning with real-world problems
 - Support students in learning to work and learn together
 - Promote interdepartmental collaboration for teachers and students
- Equity and inclusion
 - Be a safe school that promotes social justice, inclusivity and racial equality, and supports ALL learners
- School culture and wellness
 - Create an inviting environment where people want to be
 - Promote self-care and positive health, for students, staff, and community
 - Provide connection and collaboration with the community
- Preparation for the future
 - Prepare students for the 21st century world of work and use of technology
 - Value college preparation while supporting students with other goals
 - Foster and support citizenship, collaboration, school community, and service to the larger community
- Sustainability
 - Promote sustainability and consciousness of the Earth

Primary focus on educational program

OUR INNOVATORS' COMPASS

Five ways we move forward in any challenge, big or small:
with and for everyone involved, we **explore** new possibilities in...

Criteria for Prioritizing SY20-21

Inspiring

- Speaks to who we are and who we want to be

Reasonable

- Can incorporate into practice this year

Cross-Departmental

- Can help us develop a broad Nashoba identity

Impactful

- Can be reflected in use of space in a building

Go wherever moves you forward! Try, question and change things. Or follow the numbered path—think: **POPIE** ("Pop-y"): People, Observations, Principles, Ideas, Experiments and back to what happens, for all involved.

Please share! Just clearly credit Ela Ben-Ur & innovatorscompass.org (which has more resources, stories, and permissions) and share back stories to [#innovatorscompass](https://twitter.com/innovatorscompass) or ela@innovatorscompass.org.

Goals for the next year

- Be ready for arrival of an architect
 - articulate how we want to use a new building 4-5 years from now
- Provide a foundation for a 4- to 5-year plan
 - to ensure continued innovation toward a vision and readiness to fully use a new building
- Engender community support
 - for innovations in programming and the building design process
